

ENVIRONMENTAL POLICY STATEMENT

Leinster Environmentals is committed to conducting its activities in an environmentally friendly and responsible manner.

This will be achieved through:

- Complying with all applicable environmental legislation and regulations with accepted codes of good environmental practice.
- Fulfilling all compliance obligations identified in the Environmental Management System.
- Ensuring continual improvement of environmental performance.
- Protection of the environment and prevention of pollution through managing our impact on the environment in a pro-active way.
- Managing our environmental impact through ensuring waste prevention and minimization, re-use, recycling and ultimately safe disposal.
- Adopting appropriate measures to manage environmental risks, including emergency response plans.
- Taking account of the environment at all stages, including raw materials procurement, processing and distribution operations.
- Setting and reviewing specific environmental objectives and targets including targets relating to the conservation of energy and material resources, waste management and water management.
- Putting in place the necessary structures and resources, including training and awareness programmes, to underpin this policy.
